

Yeast nutrition Vinfoerm Nutrisal

Product description

Pure diammonium phosphate for improved yeast nutrition and propagation.

Ingredients

Diammonium phosphate

Treatment aim

Improved yeast nutrition and fermentation performance.

Product and effect

Increases the ammonium and phosphate content in juice. This improves the nutritional basis for the yeast. The yeast cells are able to propagate well and alcoholic fermentation is less prone to problems. The product tends to clump. This can usually be eliminated by gently kneading the bag.

Dosage

Up to 100 g/100 L depending on the must's supply. This is also the legal maximum permissible quantity.

Use

Suspend in juice or water and add to the juice. Distribute thoroughly in the tank.

Storage

Store dry, away from light. Can be transported at ambient temperature. Packs which have been opened should be immediately tightly sealed.

Allergens

Does not contain any allergens according to Regulation 1169/2011.

Packaging

Plastic bags of 100 g, 250 g, 1 kg

GMO and irradiation statement

This product does not contain GMO-organisms, nor is produced with GMO-organisms, nor has been irradiated anywhere in the production process.
